STAT S1211Q Introduction to Statistics (with Calculus)

- **Instructor**

  Wei Wang
  1255 Amsterdam Ave, Rm 901
  New York, NY 10027
  ww2243@columbia.edu
  office hours: 4-5:30pm, Mon & Wed, School of Social Work Rm 1025

- **Lecture Time**

  6:15-7:50pm Monday-Thursday, 503 Hamilton Hall, July 2nd-August 9th

- **Course Description**

  We will typically cover topics including discrete combinatorial probability; common discrete and continuous random variables and their distributional theory; population mean, variance, covariance and their sample analogs; point estimation; confidence interval; hypothesis testing; linear regression; Bayesian methods.

  But since our section meets 95 minutes per day 4 days per week for only 6 weeks, the pace will be more intense than if the course is spread out over an entire semester. We will selectively cover the topics listed above.

- **Prerequisites**

  One semester of univariate Calculus. You should be familiar with derivatives and integrals of basic functions, chain rules for differentiating composite functions and integration by substitution and integration by parts techniques. We will also do some statistical computation with R statistical computing environment. So some prior exposure to programming is expected.

- **Method of Evaluation**

  There will be 6 homework assignments, 1 midterm and 1 final exam. Their contributions to your grade will be respectively 30%, 30% and 40%. A tentative calendar is given in Table 1. Homework assignments that are be due on Thursdays will be lighter than those that are due on Tuesdays.

Table 1. Tentative calender of all homework due dates and exam dates.

	Mon	Tue	Wed	Thu	Fri
Week 1					HW1 Due
Week 2				HW2 Due	
Week 3		HW3 Due		*Midterm*	
Week 4		HW4 Due			
Week 5		HW5 Due			
Week 6		HW6 Due		*Final*	

- **Textbook**

  Probability and Statistics for Engineering and the Sciences, 8th edition, Jay Devore, Brooks/Cole, 2012

- **Teaching Assistant**

  Ran He
  1255 Amsterdam Ave, Rm 1019
